MATHIOT Raphaël JANIN Paul

How to launch the app ?

Build the project (optional)

Perhaps you would like to create the .jar file by yourself. To do this : within a command prompt, once you reach the folder named *JANIN-Paul-MATHIOT-Raphael*, containing the src and bin folders and have Maven installed, type in the following command line :

```
mvn clean package
```

The generated .jar will appear in the *target* folder. Choose the one **with** dependencies.

Execution

The uploaded folder already contains the expected .jar file (named *JANIN-Paul-MATHIOT-Raphael.jar*). Once you reach the folder named *JANIN-Paul-MATHIOT-Raphael*, please input the following command :

```
java -jar JANIN-Paul-MATHIOT-Raphael.jar
```

Or launch it by double-clicking it !

Appendix

Some useful pieces of information to log into the shopping system : we provided you with two pre-existing fictitious customers, the login information of whom are below.

Customer Edmond Dantès

Note : This customer received a large bequest, so has more Cones.
You will be able to afford more products !

Username : Wilmore
Password : Mercedes

Customer Sam Mentta

Username : SamLePirate
